Mthonjaneni Municipality
ANNUAL FINANCIAL STATEMENTS
for the year ended 30 June 2013

Approval of annual financial statements

I am responsible for the preparation of these annual financial statements, which are set out on pages 5 to 42, in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality.

I certify that the salaries, allowances and benefits of Councillors, as disclosed in note 26 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

R P Mnguni
Municipal Manager:

Mthonjaneni Municipality
ACCOUNTING POLICIES
for the year ending 30 June 2013

1 BASIS OF ACCOUNTING

1.1 BASIS OF PRESENTATION

These annual financial statements have been prepared in accordance with Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

The accounting policies applied are consistent with those used to present the previous year's financial statements, unless explicitly stated. The details of any changes in accounting policies are explained in the relevant policy.

1.2 PRESENTATION CURRENCY

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.3 GOING CONCERN ASSUMPTION

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months.

1.4 COMPARATIVE INFORMATION

Budget information in accordance with GRAP 24, has been provided to these financial statements and forms part of the audited annual financial statements.

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

1.5 TAXATION

Normal Tax Expense:

No provision has been made for taxation as the municipality is exempt from taxation in terms of section 10 (1)(a) of the Income Tax Act.

Value Added Tax (VAT):

The municipality accounts for VAT on accrual basis, based on the approval received from the Commissioner for South African Revenue Services to an application by the Municipality, permission has been given to remit or claim for value - added tax on the payments basis for debtors and creditors.

STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET

1.6 EFFECTIVE

The following GRAP standards are effective and have been adopted by the municipality:

GRAP 21 Impairment of non-cash generating assets primarily held for service delivery. The recoverable service amount is the higher of future value less costs to sell and value in use.

GRAP 23 Revenue from Non-Exchange Transactions (Taxes and Transfers). Recognised as revenue to extent that conditions have been met and Recognise liability to extent that conditions have not been met

GRAP 24 Presentation of Budget Information in Financial Statements: Regulated by National Treasury to present comparison between budget and actual amounts on comparable basis, between the last approved budget and final budget including explanation of material variances in the notes.

Mthonjaneni Municipality
ACCOUNTING POLICIES
for the year ending 30 June 2013

GRAP 26 impairment of cash generating assets held with the primarily objective of generating a commercial return. The recoverable amount is the higher of future value less cost to sell and value in use.
GRAP 103 Heritage Assets - These are assets that are held for indefinite period for the benefit of present and future generations. Initial recognition is at cost, unless acquired through a non-exchange transaction, then it is recognised at fair value.

GRAP 104 Financial Assets are cash, residual interest in another entity and a contractual right to receive cash or another financial asset or exchange financial assets or liabilities under potentially favourable conditions.

The following standards, amendments to standards and interpretations have been issued but are not yet effective and have not been early adopted by the municipality.

GRAP 20
GRAP 105
GRAP 106
GRAP 107

1.7 EVENTS AFTER REPORTING DATE

Events after reporting date that are classified as adjusting events are accounted for in the annual financial statements. The events after the reporting date that are classified as non-adjusting events have been disclosed in the notes to the annual financial statements.

1.8 COMMITMENTS

Items are classified as commitments where the municipality commits itself to future transactions that will result in the future outflow of resources.

1.9 BUDGET INFORMATION

Budget information in accordance with GRAP 24, has been provided to these financial statements and forms part of the audited annual financial statements.

2 2 PROPERTY, PLANT AND EQUIPMENT

2.1 INITIAL RECOGNITION

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction) the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

2.3 SUBSEQUENT MEASUREMENT - COST MODEL

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Where the municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset.

2.4 DEPRECIATION AND IMPAIRMENT

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives.

Infrastructure		Other	
Dwellings	30	Furniture and office equipment	5-10
Electricity infrastructure	20-30	Machinery and equipment	4-15
Roads	10-50	Transport assets	7-10
Waste disposal	50	Water assets	15-20
Non-residential buildings	30	Computer equipment	5
		Biological assets	15-30
		Cemeteries	30

Mthonjaneni Municipality
ACCOUNTING POLICIES
for the year ending 30 June 2013

The residual value, the useful life of an asset and the depreciation method is reviewed annually and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

The municipality tests for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

2.5 DERECOGNITION

Items of Property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

3 INTANGIBLE ASSETS

3.1 INITIAL RECOGNITION

An intangible asset is an identifiable non-monetary asset without physical substance. Examples include computer software, licences, and development costs. The municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- the municipality intends to complete the intangible asset for use or sale;
- it is technically feasible to complete the intangible asset;
- the municipality has the resources to complete the project, and
- it is probable that the municipality will receive future economic benefits or service potential.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

3.2 SUBSEQUENT MEASUREMENT - COST MODEL

Intangible assets are subsequently carried at cost less accumulated amortisation and impairments. The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised but is subject to an annual impairment test.

3.3 AMORTISATION AND IMPAIRMENT

Amortisation is charged so as to write off the cost or valuation of intangible assets over their estimated useful lives using the straight line method. The annual amortisation rates are based on the following estimated average asset lives:

Computer software	10 years
-------------------	----------

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at each reporting date and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

The municipality tests intangible assets with finite useful lives for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of an intangible asset is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

3.4 DERECOGNITION

Intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

Mthonjaneni Municipality
ACCOUNTING POLICIES
for the year ending 30 June 2013

4 INVESTMENT PROPERTY

4.1 INITIAL RECOGNITION

Investment property includes property (land or a building, or part of a building, or both land or buildings held under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations.

At initial recognition, the municipality measures investment property at cost including transaction costs once it meets the definition of investment property. However, where an investment property was acquired through a non-exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition.

The cost of self-constructed investment property is the cost at date of completion.

4.2 SUBSEQUENT MEASUREMENT - COST MODEL

Investment property is measured using the cost model. Under the cost model, investment property is carried at cost less any accumulated depreciation and any accumulated impairment losses.

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

5 BIOLOGICAL ASSETS

5.1 INITIAL RECOGNITION

A biological asset or agricultural produce is recognised when, and only when:

- the municipality controls the asset as a result of past events;
- it is probable that future economic benefits associated with the asset will flow to the municipality;
- and the fair value or cost of the asset can be measured reliably.

5.2 SUBSEQUENT MEASUREMENT

Biological assets are measured at their fair value less estimated point-of-sale costs.

The fair value of the pine plantations is based on the combined fair value of the land and the pine trees. The fair value of the raw land and land improvements is then deducted from the combined fair value to determine the fair value of the pine trees.

A gain or loss arising on initial recognition of agricultural produce at fair value less estimated point-of-sale costs is included in profit or loss for the period in which it arises.

6 NON-CURRENT ASSETS HELD FOR SALE

6.1 INITIAL RECOGNITION

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

6.2 SUBSEQUENT MEASUREMENT

Non-current assets held for sale (or disposal group) are measured at the lower of carrying amount and fair value less costs to sell.

A non-current asset is not depreciated (or amortised) while it is classified as held for sale, or while it is part of a disposal group classified as held for sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised in surplus or deficit.

7 INVENTORIES

7.1 INITIAL RECOGNITION

Inventories comprised of consumable stores, raw materials and finished goods. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their current location and condition.

Where inventory is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

Mthonjaneni Municipality
ACCOUNTING POLICIES
for the year ending 30 June 2013

7.2 SUBSEQUENT MEASUREMENT

inventories, consisting of consumable stores, raw materials, work-in-progress and finished goods, are valued at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. Redundant and slow-moving inventories are identified and written down in this way. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

8 FINANCIAL INSTRUMENTS

8.1 INITIAL RECOGNITION

Financial instruments are initially recognised at fair value.

8.2 SUBSEQUENT MEASUREMENT

Financial Assets are categorised according to their nature as either financial assets at fair value through profit or loss, held-to-maturity, loans and receivables, or available for sale. Financial liabilities are categorised as either at fair value through profit or loss or financial liabilities carried at amortised cost ("other"). The subsequent measurement of financial assets and liabilities depends on this categorisation and, in the absence of an approved GRAP Standard on Financial Instruments, is in accordance with IAS 39.

8.2.1 INVESTMENTS

Investments, which include fixed deposits and short-term deposits invested in registered commercial banks, are measured at the lower of cost or fair value. No impairments are required as the cost value equate to their cash values.

8.2.2 TRADE AND OTHER RECEIVABLES

Trade and other receivables are categorised as financial assets, loans and receivables and are initially recognised at fair value and subsequently carried at amortised cost. Amortised cost refers to the initial carrying amount, plus interest, less repayments and impairments. An estimate is made for doubtful receivables based on a review of all outstanding amounts at year-end. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. Impairments are determined by discounting expected future cash flows to their present value. Amounts that are receivable within 12 months from the reporting date are classified as current.

Bad debts are written off during the year in which they are identified.

8.2.3 TRADE PAYABLES AND BORROWINGS

Financial liabilities consist of trade payables and borrowings. They are categorised as financial liabilities held at amortised cost, are initially recognised at fair value and subsequently measured at amortised cost which is calculated by taking into account any discounts or premiums on settlement. Gains and losses are recognised in net income or loss when liabilities are impaired as well as through the amortised process. Trade payables are stated at the amount due to trade and other creditors for goods or other services received. The liabilities are generally settled within a period of 30 days accordingly impairments, if any are considered to be immaterial.

8.2.4 CASH AND CASH EQUIVALENTS

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash, that are held with registered banking institutions with maturities of twelve months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets: loans and receivables.

9 UNAUTHORISED EXPENDITURE

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No 56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance

Mthonjaneni Municipality
ACCOUNTING POLICIES
for the year ending 30 June 2013

10 IRREGULAR EXPENDITURE

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

11 FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

12 PROVISIONS

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the provision can be made. Provisions are reviewed at reporting date and adjusted to reflect the current best estimate. Where the effect is material, non-current provisions are discounted to their present value using a pre-tax discount rate that reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability (for example in the case of obligations for the rehabilitation of land).

The municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits is probable.

13 LEASES

Payments made under lease agreements are expensed and charged to the statement of Financial Performance on a straight line basis over a period of a lease. These agreements do not transfer risk and rewards associated with ownership of an asset to the Municipality.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are accrued on a straight-line basis over the term of the relevant lease.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease.

14 REVENUE

14.1 REVENUE FROM EXCHANGE TRANSACTIONS

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

Service charges relating to electricity are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption are made periodically when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. The estimates of consumption between meter readings are based on three months average.

Revenue from the sale of electricity prepaid meter cards is recognised at the point of sale.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the recorded number of refuse containers per property.

Interest revenue is recognised on a time proportion basis.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant approved tariff. This includes the issuing of licences and permits.

Revenue from the sale of goods is recognised when substantially all the risks and rewards in those goods is passed to the consumer.

Mthonjaneni Municipality
ACCOUNTING POLICIES
for the year ending 30 June 2013

14.2 REVENUE FROM NON-EXCHANGE TRANSACTIONS

Revenue from non-exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportionate basis.

Fines constitute both spot fines and summonses. Revenue from spot fines and summonses is recognised when payment is received, together with an estimate of spot fines and summonses that will be received based on past experience of amounts collected.

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the municipality. Where public contributions have been received but the municipality has not met the related conditions, a deferred income (liability) is recognised.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the municipality.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

14.3 GRANTS, TRANSFERS AND DONATIONS

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset. A corresponding liability is raised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

15 RETIREMENT BENEFITS

The municipality contributes in various pension schemes. These schemes are funded through trustee administered funds. The municipality has both defined and defined contribution plans. A defined contribution plan is a pension plan under which municipality pays fixed contributions into a separate entity. The municipality has no legal or constructive obligations to pay further contributions. Contributions are recognised as an expense in the Statement of Financial Performance in the year which they become payable.

The fund is actuarially valued each year using the discounted cash flow method. Any deficits identified by the actuary are recovered from the municipality in the form of surcharges added to the contributions, which are recognised as an expense in the Statement of Financial Performance in the year that they become payable.

16 IMPAIRMENT OF ASSETS

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

irrespective of whether there is any indication of impairment, the municipality also:

- tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the cash-generating unit to which the asset belongs is determined.

The recoverable service amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any impairment loss of a revalued asset is treated as a revaluation decrease.

An impairment loss is recognised for cash-generating units if the recoverable service amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit as follows:

- to the assets of the unit, pro rata on the basis of the carrying amount of each asset in the unit.

A municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase.

The Municipality operates an accredited medical aid scheme, namely key Health.
The Pensioners continue on the option they belong to on the day of their retirement.
The independent valuer ZAQ consultants and Actuaries carried out actuarial valuation as at 30 June 2013

Mthonjaneni Municipality
NOTES TO THE FINANCIAL STATEMENTS
for the year ended 30 June 2013

Note	2013 R	2012 R
The Principal actuarial assumptions were as follows		
Post-employment medical benefits		
The municipality operates on an accredited medical aid scheme, namely		
Discount rate per annum	7.75%	7.89%
Health care cost inflation rate	5.00%	6.14%
Benchmark inflation (equal to salary inflation)	7.00%	7.14%
Average retirement age	48.6	43.8
Portion of retired members who are married		
Active members	7	8
Mortality during employment		
Mortality post-retirement		
(No explicit assumption was made about additional mortality or health care costs due to AIDS)		

The amount recognised in the Statement of Financial Position were determined as being the present value of the obligation:
Movement in the defined benefit obligation is as follows.

Balance at the beginning of the year	1,740,851	1,181,667
Current service cost	114,824	97,493
Interest cost	133,354	103,396
Benefit payments	-41,000	-17,031
Actuarial(gains)/losses	-441,029	375,328
Recognition of previously unrecognised defined benefit liability		
Balance at end of year	1,507,000	1,740,853

The amount recognised in the Statement of Financial Performance were as follows

Current service cost	114,824	97,493
Interest cost	133,354	103,396
Benefit payments	-41,000	-17,031
Actuarial(gains)/losses	-441,029	375,328
Total, included in employee benefits expense (Note 16)	-233,851	559,186

Long service awards liability

The municipality has an obligation with respect to their employees in recognition of long periods of service
Employees receive additional leave in respect of long service awards The independent valuers Alexander Forbes Financial Services (Pty) Ltd, carried out a actuarial valuation as at 30 June 2013.

The principal actuarial assumptions used were as follows.

Discount rate per annum	7.40%	7.75%
Inflation rate	5.66%	5.00%
Salary increase rate	6.66%	6.00%
Benchmark inflation (equal to salary inflation)	0.69%	1.65%
Average retirement age	63	63
Average future working lifetime of active members	16.85 years	16.85 years
Active members	90.00	85
Pre-retirement mortality rate		
No explicit assumption was made about additional mortality or health care costs due to AIDS		
Percentage of in-service withdrawing before retirement		

Age

	Withdrawal Rate Females	Withdrawal Rate Males
20-24	16%	24%
25-29	12%	18%
30-34	10%	15%
35-39	8%	10%
40-44	6%	6%
45-49	4%	4%
50-54	2%	2%
55+	0%	0%

RETIREMENT BENEFITS (Continued)

Long service awards liability

The amount recognised in the Statement of Financial Position were determined as being the present value of the obligation:
Movement in the defined benefit obligation is as follows

Balance at the beginning of the year	781,606	793,000
Current service cost	118,878	119,000
Interest Cost	69,467	79,000
Benefit Payments	8,560	-60,337
Actuarial (gains) Losses	-156,391	149,057
Recognition of previously unrecognised defined benefit liability		
Balance at the end of year	805,000	781,606

Mthonjaneni Municipality
NOTES TO THE FINANCIAL STATEMENTS

Less: Transfer to non current liabilities held for sale		26,031
Defined benefit plan obligations	<u>2,312,000</u>	<u>2,496,428</u>

The amount recognised in the Statement of Financial Performance were as follows

Current Service cost	104,000	119,000
Interest Rate	63,000	79,000
Actuarial (gains)/losses	-156,391	-149,057
	<u>10,609</u>	<u>48,943</u>

39 ANALYSIS OF THE RESULT OF DISCONTINUED OPERATIONS

Clinic services	29,561	882,452
Income: Government grants and subsidies	-	-
Expenditure: employee related costs	-16,243	-835,475
Repairs and maintenance	-	-2,748
General expenses	-	-117,379
Net (deficit)/surplus from discontinued operations	<u>13,318</u>	<u>-73,150</u>

Non current assets	-	52,123
Property plant and equipment	-	231,639
Other debtors	-	2,402
Intangible assets	-	286,164

Non current liabilities	-	26,031
Retired Benefits	-	46,405
Trade creditors, leave and pro rata bonus clinic staff	-	72,436

40 ELECTRICITY DISTRIBUTION LOSSES

Units lost (kilowatts)	1,545,132	1,835,127
Units lost (sales price per kilowatts-rands)	1,514,229	1,768,282
Units lost (purchase price per kilowatt)	525,345	608,378
Units lost percentage	9.45%	10.55%

Although units per kilowatts were lost in distribution, the electricity service experienced a surplus of:

	<u>1,704,764</u>	<u>1,524,845</u>
--	------------------	------------------

41 RELATED PARTIES

The municipality did not have any related parties, or related party transactions for the years ended 2013 and 2012.
Members of key management

42 EVENTS AFTER THE REPORTING DATE

The department of Corporate Governance and Traditional Affairs offset independent conditional grant (INEP) to an amount of R10 695 000 on the 5th of July, 2013 against equitable share allocation.

43 RISK MANAGEMENT

43.1 Maximum credit risk exposure

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Mthonjaneni Municipality
NOTES TO THE FINANCIAL STATEMENTS
for the year ended 30 June 2013

	Note	2013 R	2012 R
--	------	-----------	-----------

Trade receivables comprise a widespread customer base. Management evaluates credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

Financial assets exposed to credit risk at year end were as follows

Investments	67,040,000	45 040,000
Cash and cash equivalents	721	16,062 924
Trade and other receivables	7,838,143	5,903,872
	74,878,864	67 006 796

43.2 Liquidity risk

Liquidity risk refers to the ability of an entity to meet its obligations associated with financial liabilities. The municipality's liquidity risk pertains to whether funds are available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit obligations.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position to the contractual maturity date.

44 CORRECTION OF ERROR

During the year ended 30 June 2012 and previous years, PPE and other assets were incorrectly recognised: -
The comparative amount has been restated as follows

Depreciation	-4,133,948
Net effect on surplus/(deficit) for the year	-4,133,948
Depreciation	
Net effect on surplus/(deficit) for the year	-
PPE	5,210,968
VAT receivable not previously recognised	
Non current receivables incorrectly recognised (Investing Act)	
Accruals were understated due to lack of year-end accrual	
Staff leave accrual	
Net effect on Statement of Financial Position	5,210,968 -
Net effect on Accumulated surplus opening balance	-1,077,020 -

45 CHANGE IN ESTIMATE

The useful life of certain Property plant and equipment was estimated to be 4, 5, 7, and 10 years. In the current period management have revised their estimate to 6, 8, and 12 years. The effect of this revision has decreased the depreciation charges for the current year by R 20 326 24 and future periods by R 25 896 16.
